

Global Gold's Spam Firewall Solution

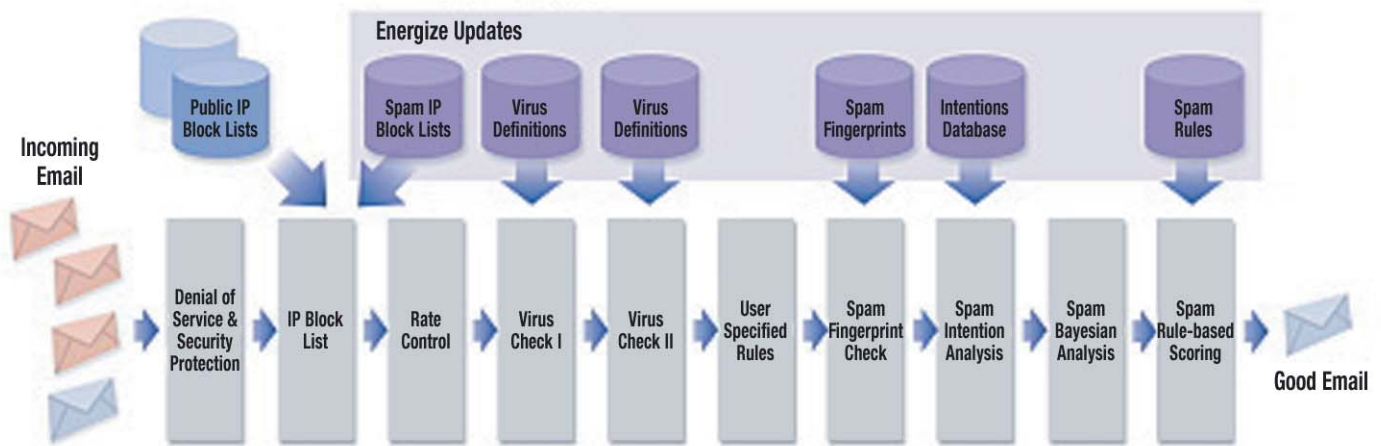

Our Spam Firewall is an integrated hardware and software solution for the complete protection of your email. It provides a powerful, easy to use, and affordable solution to eliminating spam and virus from your organisation.

It handles up to 25,000 active email users and 25 million email messages per day but can be configured to handle greater capacity and deliver higher availability.

The design leverages open source virus and spam solutions in conjunction with ten defence layers:

- 1 Denial of service and security protection
- 2 IP block list
- 3 Rate control
- 4 Virus check with archive decompression
- 5 Virus check additional
- 6 User-specified rules
- 7 Spam fingerprint check
- 8 Intention analysis
- 9 Bayesian analysis
- 10 Rule-based scoring

Spam Firewall Defence Layers

Easy to use

With no software to install and no modifications required to existing email systems, it is quick and easy to get started. Once installed, the intuitive web interface for monitoring and maintenance gets to work helping you to identify and remove viruses and spam with ease.

Maintenance is minimal, especially with the help of Energize Updates. These updates, automatically retrieved by the Spam Firewall, enable maximum spam and virus protection at all times while eliminating administrative overhead. Updates are provided by engineers working around the clock to monitor the Internet for trends in spam and virus threats.

With no per user license fee, the Barracuda Spam Firewall is the most affordable enterprise-class spam and virus protection solution available. With prices starting at £15 per month, this is easily the best solution for eliminating unnecessary spam from your operation.
